Data for 2015 are considered provisional and may change after yearly review of data.

YTD: Jan 1, 2015 through Dec 31, 2015

nc = Not counted. Reportable diseases that are unable to be counted in this report due to limited staffing resources.

* Includes *Ehrlichia chaffeensis*, *Ehrlichia ewingii*, and undetermined *Ehrlichia* /*Anaplasma* species

¶ Includes O157:H7

£ The CDC Case Definition for Lyme disease was changed in 2011, which was implemented in NH in 2012. Due to this change, comparison of data between 2012 and prior years is not recommended. The number of cases in 2014 was estimated based on the number of reports received and historical data."

+ One case of human rabies reported in 1996

‡ Includes all stages of Syphilis infection

Note: All the data in this report are based upon information provided to the New Hampshire Department of Health and Human Services under specific legislative authority. The numbers reported may represent an underestimate of the true absolute number and incidence rate of cases in the state. Any release of personal identifying information is conditioned upon such information remaining confidential. The unauthorized disclosure of any confidential medical or scientific data is a misdemeanor under New Hampshire law. The department is not responsible for any duplication or misrepresentation of surveillance data released in this report. Case counts by year are based on morbidity date, which is the date closest to onset of illness and may represent date of onset, date of diagnosis, or date of report, whichever is earliest. Case counts may not exactly match data published yearly by the Centers for Disease Control and Prevention. Data are complete as of January 11, 2016. Data prepared by Carolyn R. Fredette, MPH, 603-271-0273, carolyn.fredette@dhs.state.nh.us
