Chapter 141-C COMMUNICABLE DISEASE 141-C:20-c Exemptions. - A child shall be exempt from immunization if:

I. A physician licensed under RSA 329, or a physician exempted under RSA 329:21, III, certifies that immunization against a particular disease may be detrimental to the child's health. The exemption shall exist only for the length of time, in the opinion of the physician, such immunization would be detrimental to the child. An exemption from immunization for one disease shall not affect other required immunizations.

II. A parent or legal guardian objects to immunization because of religious beliefs. The parent or legal guardian shall sign a notarized form stating that the child has not been immunized because of religious beliefs.

Children who meet the requirements for medical and religious exemptions as stated above are considered up-to-date as they have met the school immunization requirements even though these children are not fully immunized with all the school requirements.
